

As a voter, and taxpayer I am outraged at HR 4026. I pay for this service because it is beneficial for me living outside of most listening areas. Why would you keep XM radio from allowing us to hear the weather reports that we "PAY" for. If NAB had provided a better service I would have not "PAID" for the service I have now. This is such a ridiculous topic that I cannot believe that I have to take time out of my day to write this to you. I don't like telling people how to do their job, but doesn't the FCC have more important things to worry about. Why don't you spend your time defending our children from offensive, vulgar, and idiotic music that promotes segregation, defamation, drugs, and might I add "PROSTITUTION," instead of trying to keep me from my weather updates. This makes me sick. Good day.
